Pro Circular Buffer Compounding Metal Polishing

Wen/Vector Pro Circular Compounder/Buffer

This is the circular buffer Nuvite recommends for the "compounding phase" of metal polishing with NuShine II. Use this great variable-speed (1000-3000 RPM) electronic speed controlled buffer with Nuvite NuShine II Grades F7&9, G6, and C to "heal" the surface so that it is ready to take the final finish step - "That Nuvite Look" offered by the finishing step with an orbital buffer and Grade S. (See the Detailed Polishing Procedures).

Pro features include:

- 11 amp motor with electronic control for constant speed under load
- "Soft" start,
- Locking trigger
- Three-position head handle
- 5/8"-11 spindle w/lock
- 100% ball and roller bearing construction
- Comes with standard rubber tie-on style backing plate, wrench and loose wool sleeve

Order the hook-and-loop mount Nuvite #EQ-143 hook backing plate (left) for best results when using compounding pads. You can't beat the features, and you sure won't beat the price!

Order:

Nuvite #EQ-136 Wen /Vector 7" Buffer
