PCS Professional Carpet Spotter & Cleaner

Nuvite PCS is a concentrated power soil and stain spot remover for carpets. It will clean tars, oils, soil and organic materials from natural or synthetic carpets. And, Nuvite PCS is very effective as a pre-spotter prior to full carpet extraction treatment. It can also be used as primary cleaning fluid in rotary carpet cleaning machines. It helps you meet the toughest cleaning problems from carpets in all aircraft, RV, marine, auto and truck applications, and is extremely handy for use in institutional, commercial and home upkeep use.

PCS Professional Carpet Spotter

- Penetrates and removes tars, oil, soil and organic materials
- Effective and unique cleaning action leaves no soapy or sticky residue
- Biodegradable –safe and pleasant for users and the environment
- Non-toxic to users
- Retards re-soiling

Availability:

Quart, 1 & 5 Gallon or 55 Gallon Drums

Effect on Aircraft Materials:

Nuvite PCS Professional Carpet Spotter conforms to the requirements of

- Douglas CSD #1 • Boeing D6-17487 •

for safety to bare and clad 2024, 7075, 2524 aluminum, cadmium plated steel, mild steel, high-strength steel, Plexiglas, and paint.

Health and Safety:

Nuvite PCS is not environmentally restricted. Users should use standard safety precautions, such as wearing gloves and eye protection along with any other standard safety procedures. Refer to Material Safety Data Sheet for further information.

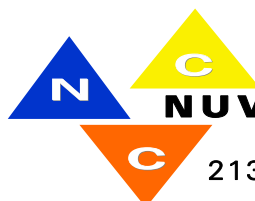

Directions For Use:

Spot cleaning: Dilute Nuvite PCS 1:4 to 1:8 with water. Test carpet for color fastness in inconspicuous area. After determining that carpet is color fast, spray terry towel to dampen cloth, then apply to soiled spots. Soak out as much soil as possible into dry terry towel. If soil spot persists after soaking with towel, spray PCS directly on spot and use soft brush to agitate up and down, then side to side. Reapply dry terry towel to soak out agitated residue. Repeat as needed. Do not allow PCS to soak carpet backing. Follow with full carpet extraction prior to PCS drying if using as a pre-spotter.

Rotary Carpet Machine Application: Follow instructions on machine, using 1: 4 to 1: 9 dilution, depending upon soil. Lukewarm water may be used. Do not allow carpet backing to be soaked

Contact Nuvite representatives for further information/assistance.

When using Nuvite materials, please refer to the appropriate procedures and recommendations for use and equipment, or consult with your Nuvite representatives.
